International Health and Safety Passport (IHSP)

Duration: Foundation - 1 day, Leading a Team Safely – 1 day

 **What is it?** The IHSP is an internationally recognised health and safety scheme that includes a Foundation course and a Leading a Team Safely (LaTS) course. The qualifications are transferable across countries, sectors and sites. The ECITB issues around 45,000 safety passports each year worldwide, which have been used by contractors as a minimum health and safety requirement on numerous large-scale projects.

Who is it for? The IHSP Foundation course is suitable for all site staff and ensures that there is a base level of health and safety awareness that enables employees at every level to work more safely with lower risks to themselves and others. The LaTS course is designed to equip team leaders and managers with the essential skills and knowledge required to effectively lead their teams while maintaining the highest standards of safety and efficiency.

What does it cover? Key topics include safe behaviours at work; risk assessments; hierarchy of control; manual handling; use of work equipment regulations; hand arm vibration; confined spaces; working at height; lifting operations and regulations; site transport; signage; excavations; electric isolation; environmental concerns; reporting injuries and other dangerous occurrences.

How is it delivered? The courses are delivered in English in a classroom through one of the ECITB's Licensed Training Providers who are located across the world. They can also be delivered in other languages.

How do I get started? Whether you are an employer, training provider or individual learner, more information is available on ECITB Global website, including links to "Contact Us".
